Supplemental Figure 10. *In vivo* experiment of NSG mice bearing D283 Med-GFP-FF-Luc cells treated with NT or CAR.GD2 T-cells. Flow cytometry analysis of CD4⁺ CD8⁺ subset cells in tumor bearing mice treated with NT T-cells (**A**) and CAR.GD2 T-cells (**B**) at pre-infusion and day+17, day+31 and day+45 post tumor. Data are shown as average $\pm$ SD of 2 HDs.
