

Supplemental Figure 4

B

Supplemental Figure 4. Real-Time killing assay of CAR.GD2 T-cells vs D283 Med-GFP-FF-Luc cell line. D283 Med-GFP-FF-Luc were co-cultured with NT or CAR.GD2 T-cells at the E:T ratio of 1:1 and the Total Green Object Integrated intensity (GCU x μm^2 \Image), reported as “Green Area Confluence”, was analyzed from 0 up to 96 hours of co-culture **(A)**. Data are derived from NT/CAR.GD2 T-cells of 3 different HDs; Green Area Confluence of D283-GFP cell line was normalized on T0. Experiments were performed in triplicate and values are reported as mean $\pm$ SEM. * $p < 0.05$, ** $p < 0.01$ and **** $p < 0.000$. **(B)** The sequential images of D283 Med-GFP-FF-Luc co-cultured with NT or CAR.GD2 T-cells are shown at 0, 12, 24, 48, 72 and 96 hours.
