

(a)

(b)

Supplementary Figure 2. No significant toxicity of ACE2016 in SCID-Beige mice. (a) Body, lung, heart, liver, spleen and kidney weight, and (b) hematology of the core battery and 14-day recovery battery studies were analyzed. SCID-Beige mice treated with ACE2016, $\gamma\delta 2$ T cells, or Vehicle (n =10 per group) in the core and recovery battery studies were sacrificed on days 1 and 14 post the last dose. Data were presented in mean value $\pm$ S.D.
